Sumalatha, Nunna
Frontend Developer

Front-end developer with over 7 years of experience building web applications and dashboards. Successfully programmed and delivered large complex dashboards for Infosys (Apple) & IBM using Angular and React. Strong problem solving skills, in-depth understanding of Javascript, an eye for detail, demonstrated logic implementation in real time projects, skilled in utilising JIRA and GIT for effective project management and version control. Experienced in Agile development and API integration. Eager to leverage my diverse skill set and hands-on experience in creating seamless and visually appealing web interfaces. Presently living in Frankfurt with German work visa and am ready to start immediately.

Expertise

Angular 17	React	RxJS
JavaScript	TypeScript	Ionic
Node.JS	D3	MySQL
Mongo DB	IBM Cloud	Figma
Rest APIs	Swagger	Docker
Jenkins	Tailwind	RIO
CI / CD	GIT	Karma
Scrum Master	JIRA	

Language

German - A1   English - C2

Education

2010 - 2014

Bachlors of Technology Computer Science

Nimra Collage (JNTU-K University)

Experience

Infosys (Awign)   July 2023 - April 2024
Angular Developer - CAAT Dashboard (Client : Apple)

Designed Apple product labels across various categories, languages, and specifications with precise label creation using Canvas, closely coordinating with Apple administrators. Ensured high standards of accuracy and consistency by referencing Adobe InDesign for meticulous Canvas design.

- Created responsive, efficient SPAs using Angular 15+ and TypeScript, promoting reusable code and high quality through active involvement in code reviews and the product lifecycle.
- Conducted R&D to develop Canvas features, including drag-and-drop text, images, barcodes, and QR codes, integrating translators using plugins and generating XLIFF files with source and target content.
- Integrated CK Editor plugins into Canvas with text editing features such as font family, color, spacing, font size, line spacing, and letter spacing.
- Generated dynamic HTML template previews of label content.
- Managed project deployment using Rio and Spinnaker; oversaw project management with Radar.

IBM India - Hyderabad, India   Aug 2018 - May 2023
Application Programmer - ISD & GBS sales dashboard

Served as the primary dashboard representing global sales and project pipelines, including business proposals, requirements gathering, contract creation, negotiation with clients, internal product pipelines, and more, categorized geographically. The Dashboard included wide ranging features such as custom data visualization, report generation, and sophisticated analysis tools, aiding the sales team in achieving their targets.

- Developed a robust application from the ground up using Angular 10+, React with Carbon Framework and Bootstrap, ensuring high performance and scalability.
- Designed and implemented dynamic D3 graphs to visualize IBM sales and pipeline data, including bar graphs, line graphs, pie charts, donut charts, and customized table and graph patterns, enhancing data representation.
- Participated in design and scrum meetings to discuss and refine sales data visualization and UI representation, resulting in more interactive and user-friendly services.
- Integrated and tested APIs using Postman, ensuring seamless communication between front-end and back-end systems.
- Mentored and guided junior developers, elevating team expertise and significantly accelerating project delivery timelines.

Village IT Sols| India   Dec 2017 - June 2018
Ionic Developer

- Designing, developing and implementing solutions for Mobile Hybrid App (IONIC).
- Collaborate with cross-functional teams to define, design, and develop new features.
- Hands on Working experience with REST, JSON, API/Services.
- Developed immersive, responsive, consumer-facing applications using XCode.
- Generating APK files for Android and XCODE files for IOS and partially performed deployment of the APP in App store and Play store.

Kstrata IT - Hyderabad, India   Feb 2015 - Aug 2017
UI Developer

- Translated designs and wireframes into high-quality code using HTML5, CSS3, Javascript, and Bootstrap.
- Engaged in 40+ hours of training in Modern Javascript frameworks.
- Collaborated with designers and performance team on designing updates to sites and blogs, improving user experience.
